

Emerging Technologies – Delivering Agile Proof-Of-Concepts

Week 1

Week 12

Visionary space

- Dream of the possible... extensibility
- Define the PoC realistic prioritised wish list based on a user stories with customer

Imagination

2

Community use and feedback

- Train, deploy and gather feedback

Engage

4

WWW and EBI

- Expressly built in time to digest, discuss and act upon learnings

Learn

6

Assess

1

Do

3

Measure

5

Tell

7

Use case ideation

- Optimal use case, understanding the problem/optimisation space

Agile factory work

- A bit of planning, governance, project management and development, to deliver a low-tested viable PoC

Track progress

- Continuously sample and track progress, focus on key measurements that matter and that are actionable in the 'now'

Share results

- We could have built the best thing in town; if no one hears about it, it didn't happen
