Who we are

Public Digital is a specialist digital transformation consultancy.

What we do

Our mission is to bring some of the world's biggest institutions into the internet era, and improve millions of people's lives.

Today we'll be:

- Sharing insights from our work with the London Office of Technology and Innovation (LOTI) and the Office for Public Service Innovation (OPSI)
- Framing conversations to explore local collaboration
- Sharing your insights with the peer group

Insights from LOTI

**The London Office of
Technology and Innovation**

Collaboration at scale

Projects

Find out about our latest activities with our members.

Filter by: Boroughs Status Workstreams **APPLY FILTERS**

Pan London IoT Declaration

GLA, LOTI and a collection of London Boroughs are working together to create a common approach to using and generating data from Internet of Things sensors.

LOTI Sandbox in Adult Social Care

An approach that brings together key actors in the health and care system, to experiment with the latest tech, data & innovation to solve key challenges in the sector.

Pan London IoT Damp and Mould Project

Delivering health and wellbeing outcomes for Londoners through better damp and mould data collected through sensors to inform services.

New Service Models in Adult Social Care

Supporting London boroughs to think about radical new approaches to meeting social care needs.

Piloting a home care cooperative in Clapton

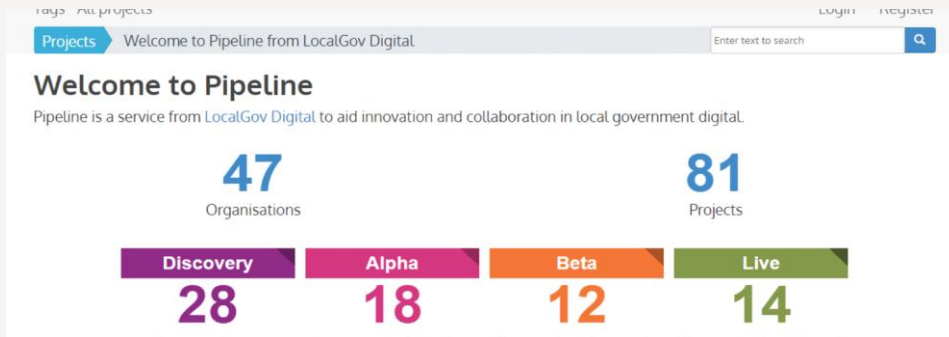

An integrated, localised, home care service that puts community networks, trained care workers and care recipients at the heart of its delivery.

Developing a data platform for frontline care workers

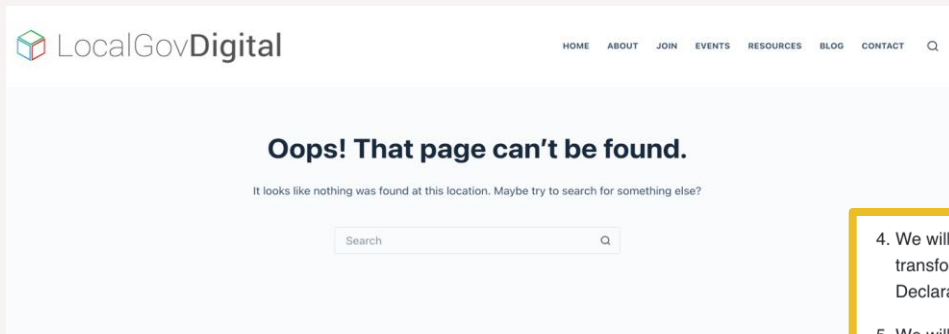

Seeking to identify the most useful data sets to that people needing care can be supported in a timely and appropriate way.

But collaboration can be hard too...

2018

2024

4. We will demonstrate digital leadership, creating the conditions for genuine organisational transformation to happen, and challenging all those we work with to embrace this Local Digital Declaration.
5. We will embed an open culture that values, incentivises and expects digital ways of working from every member of our workforce. This means working in the open wherever we can, sharing our plans and experience, working collaboratively with other organisations, and reusing good practice.

Insights from OPSI

**The Office for Public
Service Innovation**

OPSI Vision:

A Liverpool City Region where improving people's life chances through innovation and data is further embedded at the heart of local public services, working with the communities and places they serve

LIVERPOOL
CITY REGION
COMBINED AUTHORITY

METRO MAYOR
LIVERPOOL CITY REGION

The Office for Public Service Innovation – OPSI

Transforming Lives through Data,
Collaboration and Early Action

User Needs

As a **local authority data lead** I need OPSI to do some of the legwork for me to generate some capacity so that OPSI doesn't just create more work

"[OPSI needs to be] something that does the heavy lifting for organisations"

User Needs

As a **local authority data/tech leader** I need a way of sharing the lessons we have learned and learning from other local authorities so that we aren't all starting from scratch every time

"We have done it, and then shouldn't we share out learning? I think this is how it should work - I would sooner have collaborative sharing"

It's not clear to people HOW to do more data sharing

"Even triangulating multiple data sets from one organisation can be challenging"

"The Digital economy act? I don't know about that legislation. I only know about my own legislation."

"This was a government endorsed project on a national scale, so it made the IG easier"

**Partners are
struggling with
CAPACITY and
can't take on
more**

"Capacity to doing the work is a huge challenge"

"There is a lack of capacity to think about what the problems are we could solve with digital"

"OPSI could do the heavy lifting for orgs, for things we don't have the time and headspace to do"

Conversations to explore local collaboration

How it will work:

- Move to tables, try and mix if you can
- 2 x questions, 10 mins per question, capture your highlights on post-it notes
- We'll ask each table to feedback - 1 minute, 2 x highlights or insights

01

Where are you already collaborating well?

- what type of collaboration is it?
- what is the impact?
- what made it work?
- what could make it work better?

02

p-d

15

Where are your opportunities to go further?

- what's in the pipeline?
- what would help to get things moving?
- how do we move from talking to doing?

Sharing our insights
